Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:
<b>Step 2: Domain Choice</b> What domain did you choose to fine-tune the Meta Llama 2 7B model on? Choices: <ol style="list-style-type: none"><li>1. Financial</li><li>2. Healthcare</li><li>3. IT</li></ol>	IT
<b>Step 3: Model Evaluation Section</b> What was the response of the model to your domain-specific input in the <b>model_evaluation.ipynb</b> file?	A second important aspect of ubiquitous computing environments is > the need for personalization and adaptivity. This is a challenge that requires a personalized user interface (UI) that can adapt to the user's needs, preferences, and activities. The UI should be able to adapt to the user's preferences, such as the language, font size, and color
<b>Step 4: Fine-Tuning Section</b> After fine-tuning the model, what was the response of the model to your domain-specific input in the <b>model_finetuning.ipynb</b> file?	A second important aspect of ubiquitous computing environments is > [{'generated_text': ' the need for the devices to be able to communicate with each other. The Internet of Things (IoT) is a term used to describe the many devices that are now able to connect to the Internet. The IoT has the potential to revolutionize the way we live and work.\n\nThe IoT is a'}]
